

## Special Issue

# Micro-Nano Sensors and the Internet of Things for Intelligent Energy

### Message from the Guest Editors

Sensors and internet of things (IoT) technologies are the basis for the development of intelligent energy and play a significant positive role in carbon neutrality. In the field of intelligent energy, micro-sensors and IoT technology require special functions and designs to monitor and analyze the operating status of equipment. This Special Issue focuses on the application and development trend of micro-nano sensors and IoT technologies for intelligent energy, introduces advances in micro-nano sensors and their various intelligent-energy-related applications in IoT technologies, including the smart grid or the internet of things for electric power and so on. Papers detailing the development direction of specific micro-nano sensors and internet of things in regard to intelligent energy are also welcome.

### Guest Editors

Dr. Wei Li

Dr. Tie Li

Dr. Fengyuan Gan

Dr. Daohan Ge

### Deadline for manuscript submissions

closed (15 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
