

Special Issue

New Trends for Millimeter-Wave Antennas and Devices: Design, Manufacturing, and Measurement for the 5G Era and Beyond

Message from the Guest Editors

In this Special Issue, researchers from both academia and industry are invited to contribute with their innovative research and future trends for millimeter and submillimeter-wave communication systems. This Special Issue will ignite an important discussion within *Sensors* MDPI resulting in the fundamental research of new technologies that will enable the next generation of communication systems. Potential topics include but are not limited to the following:

- New communication systems at millimeter-wave frequencies;
- Technology and system architectures at millimeter-wave frequencies;
- New technologies and techniques for millimeter-wave device design and development;
- New additive manufacturing techniques in millimeter and submillimeter-wave bands;
- Antenna design and technical solutions for millimeter and submillimeter-wave communication systems;
- Measurement techniques at millimeter and submillimeter-wave frequency bands;
- Millimeter-wave over-the-air (OTA) measurements (anechoic and reverberation chambers).

Guest Editors

Dr. Adrián Tamayo-Domínguez

Dr. Pablo Sanchez-Olivares

Dr. José M. Fernández-González

Deadline for manuscript submissions

closed (30 April 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
