

## Special Issue

# Mobile Computing and Ubiquitous Networking

### Message from the Guest Editors

The Special Issue will be associated with, though not exclusively, the 11th International Conference on Mobile Computing and Ubiquitous Networking (ICMU2018). The authors of papers accepted to ICMU 2018 are invited to submit extended versions to this Special Issue. In this Special Issue, potential topics include, but are not limited to:

- Wireless access technologies
- Networked sensing, and applications
- Mobile device architectures
- Mobile systems and applications
- Mobile data management and analytics
- Mobile multimedia
- Mobile user interfaces and interaction technologies
- Energy aware mobile computing
- Mobile cloud computing
- Social network applications to mobile computing
- Context and location aware applications and services
- Trust, security and privacy
- Edge computing
- Machine learning for mobile and ubiquitous computing

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
