

## Special Issue

# Mobile Crowdsensing in Smart Cities

### Message from the Guest Editors

Mobile Crowdsensing (MCS) is a novel paradigm that leverages the collective awareness of a crowd so that a phenomenon of common interest can be monitored through the aggregation of information collected from personal mobile devices. While MCS application to Smart Cities is impeded by several challenges. These include: 1) efficient recruitment of users, which is a hard task, particularly because of the privacy restrictions that limit the exchange of information; 2) dealing with “the curse of sensing”, i.e., the tendency of MCS to collect data that in certain locations may be too sparse, leading to a poorly described phenomenon; 3) effective mechanisms for rewarding users to encourage participation; and 4) testbeds and techniques for testing large-scale MCS applications in situ, which is highly relevant to the research community given the challenge of involving a high number of people in data collection.

- application of mobile crowdsensing to smart cities
- mobile and pervasive crowdsensing testbeds and experiences
- large-scale environmental monitoring
- privacy preservation
- recruitment
- mobile-edge computing

---

### Guest Editors

Dr. Federico Montori

Prof. Dr. Luciano Bononi

Prof. Dr. Prem Prakash Jayaraman

---

### Deadline for manuscript submissions

closed (20 November 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
