

## Special Issue

# Smart TDR Sensors for Moisture Measurement

### Message from the Guest Editors

Time Domain Reflectometry (TDR) plays a significant role among the techniques of moisture detection in porous media. It is an electric technique applied for determining the apparent permittivity of porous materials by the measurement of electromagnetic pulse propagation time along the metal rods of measuring probes. For many years, it has been widely applied by scientists and engineers to measure moisture of soil but also to evaluate parameters of other porous media such as rocks or building materials. The TDR method is continuously developing. New devices are being designed, techniques of signal processing are improved, probes constructions are modified and new formulas of calibration are estimated. This Special Issue is addressed to all researchers that develop the TDR sensing technique of moisture detection.

### Guest Editors

Dr. Zbigniew Suchorab

Faculty of Environmental Engineering, Lublin University of Technology,  
40B Nadbystrzycka Str., 20-618 Lublin, Poland

Dr. Grzegorz Łągód

Faculty of Environmental Engineering, Lublin University of Technology,  
Nadbystrzycka 40B, 20-618 Lublin, Poland

### Deadline for manuscript submissions

closed (20 October 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
