

Special Issue

Sensors and Musculoskeletal Dynamics to Evaluate Human Movement

Message from the Guest Editors

The Special Issue “Sensors and Musculoskeletal Dynamics to Evaluate Human Movement” aims to highlight the necessity of sensing and modeling to extract metrics of human performance in research, clinical, and sports applications. We welcome contributions that combine sensors and models to quantify and explain human performance. Contributions that address but are not restricted to the following topics are welcome:

- Wearable sensors to measure human performance in terms of: Kinematics; Kinetics; Musculotendon mechanics; Energetics and/or metabolic cost;
- Neuromuscular and musculoskeletal models to estimate performance metrics from wearable sensors;
- Reliability and accuracy of direct sensor measurements versus model-based estimates;
- Experiments and methods to identify and quantify sensor borne errors due to noise, bias, and drift;
- Improvements in sensor to model registration and calibration;
- Algorithms to combine and integrate multiple sensors to extract novel measures of performance or to improve upon the accuracy and reliability of existing metrics;
- Models and methods to standardize measurements and comparison of human performance across individuals.

Guest Editors

Dr. Ajay Seth

Biomechanical Engineering, Delft University of Technology

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
