

Special Issue

Nanoparticles for Drug Delivery and Biosensing Applications

Message from the Guest Editor

The main goal of this Special Issue is to capture the current state-of-the-art and contemporary progress in a variety of nano-biomaterials and nanomedicines development and their different disease applications. Suggested drug-delivery topics are smart platforms, redox active, stimuli-responsive, supramolecular, targeted drug delivery, drug-delivery sensors, and imaging-guided therapeutic platforms. Both research papers and review articles will be considered. If you are interested in contributing to this Special Issue, I would very much appreciate receiving the tentative title of your contribution.

- drug delivery
- smart materials
- stimuli responsive drug delivery
- supramolecular biomaterials
- nanomedicine
- multi-functional materials
- controlled release
- sensors-based drug-delivery
- on-demand drug-delivery
- biosensors drug delivery

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
