

## Special Issue

# Research Progress in Electrochemical Aptasensors and Biosensors

### Message from the Guest Editors

This Special Issue, "*Research Progress in Electrochemical Aptasensors and Biosensors*", welcomes original research papers and reviews addressing recent advances in electrochemical biosensing technology, including, but not limited to: synthesis of new electrode materials and engineering of their functional properties, integration of nanomaterials towards electrochemical signal amplification in biosensors, and fabrication and performance evaluation of new biosensing devices based on natural or synthetic biorecognition elements. **Keywords:**

- electrochemical biosensors
- aptasensors
- DNA biosensors
- immunosensors
- enzyme biosensors
- nanotechnologies for biosensors
- functional electrode materials
- molecular-imprinted polymers
- healthcare
- food control
- environmental monitoring
- lab-on-a-chip
- point-of-care

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
