

## Special Issue

# Non-orthogonal Transmission Technologies for Ubiquitous Sensor Networks

### Message from the Guest Editors

Future sensor networks will witness a paradigm shift towards heterogeneous devices, massive connections, and ubiquitous distributions as we progress towards 2030. Existing wireless transmission technologies suffer from restricted connectivity, expandability, and spectral efficiency. There is a growing interest in technologies capable of overcoming these challenges. Non-orthogonal transmission techniques allow multiple users to share the same transmission media, providing additional degrees of freedom for efficient communication. The aforementioned requirements for future sensor networks could be fulfilled by the novel non-orthogonal physical-layer technologies (e.g., non-orthogonal multiple access, waveforms, and precoding). Novel recently developed ideas have triggered the evolution of transmission technologies for future ubiquitous sensor networks. This Special Issue of *Sensors* aims to collect state-of-the-art research papers on topics including but not limited to:

- NOMA
- modulation design
- multi-user communication
- MIMO
- integrated space–air–ground network
- satellite communications
- machine learning
- edge computing

### Guest Editors

Dr. Neng Ye

Dr. Aihua Wang

Dr. Chao Zhu

### Deadline for manuscript submissions

closed (5 May 2024)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
