Special Issue

Carbon Nanomaterials for Imaging and Sensing Applications

Message from the Guest Editor

Over the past decade, carbon nanomaterials have emerged as sustainable and cost-effective tools at the nanoscale. These materials have garnered significant attention owing to their versatile physico-chemical and optical properties. Carbon nanomaterials have found widespread use in a myriad of applications most importantly as imaging tools and sensing probes. *Sensors* is dedicated to the publication of cutting edge research in imaging and sensing applications. Given the rise in interest in carbon nanomaterials in these areas, the guest issue will fall perfectly within the scope of the journal's mandate, i.e., the communication of top level and urgent science.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
