# **Special Issue**

# **Novel Optical Fiber Sensors**

## Message from the Guest Editors

As a broad category of sensors, optical fiber sensors have experienced sufficient development due to their compact structure and advantageous performance. It has been reported that optical fiber sensors can be applied in the sensing of parameters of many kinds, with new attempts being made in, e.g., film coating, arc discharge processing, femtosecond laser micro machining, and additive manufacturing based on laserinduced two photon polymerization, to extend the applications and improve the performance of the devices. This Special Issue aims to introduce the frontier progress in the development of novel optical fiber sensors. **Keywords** 

- Optical fiber sensors
- Optical fiber micro cavities
- Optical fiber gratings
- Optical fiber resonators
- Multi-parameter sensors
- Fiber tip microstructures

# About the Journal

# Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

#### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

## Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
