

## Special Issue

# Optical Fiber Sensors: New Trends and Applications

### Message from the Guest Editors

Sensors based on optical fiber technology have been around for a long time but remain a constant object of dynamic and fruitful fundamental and applied research, with a variety of new applications and developments. We invite you to submit manuscripts for an upcoming Special Issue dedicated to all aspects relevant to optical fiber sensing. Full papers, communications, and reviews are welcome. The purpose of this Special Issue is to collect advances in fundamental research, the development of technologies, and innovative applications of optical fiber sensors, including different sensor platforms and configurations, sensing mechanisms and applications. Reviews must offer a critical overview of the state of the art on the fundamentals, technologies, and applications pertinent to optical fiber sensors. For more details, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
