

Special Issue

Optic Fiber Sensing Technology for Marine Environment

Message from the Guest Editors

There has recently been a growing interest in the potential use of optic fiber sensing technology for marine environments. As the ocean observation process accelerates, the application of optical fiber sensing technology in this field has become a research hotspot for the characteristics of strong adaptability to harsh environments and easy large-scale networking. This Special Issue therefore aims to put together original research and review articles on recent advances, technologies, solutions, applications, and new challenges in the field of optical fiber sensing technology for marine environments. For more details, please visit [here](#).

Guest Editors

Prof. Dr. Fang Li
Prof. Dr. Chi Wu
Prof. Dr. Zhou Meng

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
