

## Special Issue

# Advances in Wireless Power Transfer Technologies for Sensor Applications

### Message from the Guest Editor

Wireless power transfer (WPT) has emerged as a transformative technology for powering sensor networks, enabling autonomous operation in environments where wired charging or battery replacement is impractical. This Special Issue(SI) explores the latest advancements in WPT techniques—including inductive coupling, resonant coupling, radio frequency (RF) energy harvesting, and laser-based power transmission—tailored for sensor applications. Topics of interest include efficiency optimization, miniaturization of WPT systems, energy management strategies, and integration with IoT and wearable devices. This SI welcomes contributions from papers that focus on the latest advances in WPT technology in the above or other applications. Topics of interest of this SI include, but are not limited to, the following:

- State of the art in inductive/capacitive WPT technologies;
- Far-field WPT systems based on radio frequency, laser, or ultrasound;
- Finite Element Analysis (FEA)-based designs of WPT coils, ferrites and shieldings;
- Power electronic converters—modeling, analysis, design, and testing;
- WPT compensation networks including both active and passive types;

### Guest Editor

Dr. Wei Han

1. Sustainable Energy and Environment Thrust, The Hong Kong University of Science and Technology (Guangzhou), Guangzhou 511453, China
2. Department of Electronic & Computer Engineering, The Hong Kong University of Science and Technology, Hong Kong SAR, China

### Deadline for manuscript submissions

31 August 2026

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
