

## Special Issue

# New Technology and Application of Optic Flow Sensors

### Message from the Guest Editors

Our aim is to present and highlight advancements and the latest technologies, implementations, and new and emerging applications in the field of optic flow sensors. We intend to collect manuscripts on the design and development of new instrumentation and the definition of innovative measurement methodologies and procedure progress regarding their characterization and applications. Potential topics include but are not limited to: Sensor design, construction, and testing  
Metrological aspects Modeling and statistics  
Cyberphysical systems and IoT Fiber optic devices  
Object detection and tracking Image dominant plane extraction Machine vision Movement detection Robot navigation Visual odometry Control of micro air vehicles  
Drone

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
