

Special Issue

Distributed Systems, IoT, and CPS: Enabling Healthcare 4.0 and Smart Healthcare Systems

Message from the Guest Editors

In this Special Issue, we explore the various advancements in distributed systems technologies and the use of sensors, IoT and CPS to create and support different types of healthcare applications that could/will constitute the encompassing Healthcare 4.0 and smart healthcare systems. Smart systems require the use and integration of various intricate hardware and software components. These systems also require a well-established distributed infrastructure that can deliver performance and reliability in addition to supporting the collaborative nature of these applications. Advances in sensors, IoT, CPS, distributed architectures, and middleware technologies are making it possible to create sophisticated Healthcare 4.0 and smart healthcare systems. For this Special Issue, we aim to collect some of the research and development results in these to create a collection of state-of-the-art works that will help further the advancements in the field and help other researchers and developers as they explore the field and create these systems.

Guest Editors

Prof. Dr. Jameela Al-Jaroodi

Department of Engineering, Robert Morris University, Moon Township, PA 15108, USA

Dr. Nader Mohamed

Computer Science & Information Systems Department, Pennsylvania Western University, California, PA 15419, USA

Deadline for manuscript submissions

closed (31 August 2024)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
