

Special Issue

Advances in Electrochemical Sensors for Biomarker Detection, Biomolecular Interaction Analysis and Nanomaterial-Enhanced Sensing Platforms

Message from the Guest Editor

This Special Issue, *Advances in Electrochemical Sensors for Biomarker Detection and Biomolecular Interaction Analysis*, seeks to explore the latest developments and applications of these technologies. It aims to showcase cutting-edge innovations that enhance the capabilities of electrochemical devices, with a focus on novel sensing strategies, improved analytical performance, and emerging applications. Topics of interest include but are not limited to the following:

- Development of novel electrochemical sensing materials and architectures for biomarker detection.
- Integration of sensors with microfluidics and lab-on-a-chip platforms for high-throughput analysis.
- Electrochemical approaches for real-time and quantitative analysis of biomolecular interactions, including protein–ligand, DNA–protein, and receptor–target studies.
- Applications in disease biomarker detection, drug discovery, environmental and food monitoring.
- Emerging trends in wearable and implantable electrochemical biosensors.

We welcome original research articles, comprehensive reviews, and perspectives that address current challenges and future opportunities in this rapidly evolving field.

Guest Editor

Dr. Dhesmon Lima

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
