

Special Issue

Blockchain in Future Wireless Sensor Networks: Integration and Use Case Applications

Message from the Guest Editors

The proposed Special Issue will comprise a collection of the latest high-quality technical research and industrial papers with novel results covering the application and integration of the blockchain in future wireless networks. The main aim of this Special Issue is to provide a platform for the dissemination of major research challenges and achievements on this topic. Theoretical investigations as well as experiments/demonstrations are welcome. Keywords:

- blockchain
- 5G and beyond
- 6G
- future wireless networks
- Internet of Things
- wireless sensor networks
- distributed networks

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
