

## Special Issue

# Blockchain Security and Its Application in Internet of Things (2nd Edition)

### Message from the Guest Editors

This Special Issue is focused on new security solutions for scenarios or applications where blockchain and the Internet of Things are deployed in various areas. We invite researchers to contribute research and review articles that further the efforts leading to future improvements in security and privacy in Blockchain and IoT settings. Submissions on topics including but not limited to the following are welcome:

- Blockchain and IoT solutions on existing systems;
- Blockchain security and privacy;
- Blockchain issues and trends;
- Blockchain authentication and authorization;
- Blockchain-based security for IoT;
- Cryptographic protocols for Blockchain and IoT;
- Data and system integrity in Blockchain and IoT;
- IoT-based solutions on the Blockchain system;
- IoT authentication and authorization;
- Security and privacy in IoT;
- Service and system design in IoT; and
- Trust management and untraceability in Blockchain and IoT.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
