

Special Issue

Wide Bandgap Power Integrated Circuits and Sensors

Message from the Guest Editors

This Special Issue aims to collect original and review articles on wide bandgap (WBG) power-integrated circuits (IC) and sensors in the ongoing transition from discrete power and sensor devices to fully integrated power circuits. Wide bandgap power integrated circuits (IC) enable highly efficient, compact and low-cost power conversion in areas such as electromobility, renewable-energy conversion, chargers, robotics, etc. Potential topics include (but are not limited to):

- WBG power devices and ICs and sensors, as well as sensor integration.
- SiC, GaN, Ga₂O₃, AlN, diamond, etc. (WBG) power ICs and devices.
- Internal/external sensors and readout circuits for/in power ICs.
- Interfaces between power ICs and sensors.
- Sensing of electrical (current, voltage, power, resistance, etc.) thermal (temperature, heat flow, calorimetric, power loss,) optical, environmental and other quantities.
- Analog, mixed-signal, digital, smart and AI-based approaches.
- Particularities from the power IC or sensor technology.
- Extreme conditions and designs (high temperature, fast switching, high slew-rate, high-density, etc.).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
