

Special Issue

Recent Advances in Fiber Bragg Grating Sensing

Message from the Guest Editor

Fiber Bragg gratings (FBG) have been used in different applications for more than 40 years. They are considered reliable sensing elements and fiber laser components, while their sensing characteristics could be adjusted according to the hosting fiber material. This Special Issue aims to cover a broad spectrum regarding FBG sensing technology in the form of regular and review papers. Topics of interest include but are not limited to the following:

- Grating structures, tilted Bragg gratings, long period gratings, chirped gratings;
- FBGs in specialty optical fibers (polymer fibers, silica fibers, sapphire fibers, etc.);
- Advanced FBG-based mechanical and physical sensors;
- Advanced FBG-based biomedical, chemical, and environmental sensors;
- Performance of FBG systems in real environments;
- Demodulation algorithm and signal processing of complexed FBG sensors;
- FBG-based monolithic fiber laser systems;
- Performance of FBGs in harsh environments;
- FBG applications in the oil and gas industry, robotics, structural health monitoring, aerospace missions, civil structure, smart textiles, and other areas.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
