

Special Issue

Integrated Sensing and Communication

Message from the Guest Editor

The ultimate goal of ISAC is to integrate and unify communication and radio sensing operations toward a mutually beneficial relationship. The benefits of ISAC can be divided into two categories: 1) integration gain to use spectrum resources efficiently, and 2) coordination gain to balance the mutual functions. It is expected that ISAC will have broad prospective applications as the foundation of future 6G wireless networks. This Special Issue aims to attract novel and solid contributions to ISAC. Contributions are solicited on, but not necessarily limited to, the following topics:

- Fundamental limits and performance analysis of ISAC;
- Advanced waveform, channel coding, and modulation designs for ISAC;
- Novel multiple access designs for ISAC;
- Machine learning aided ISAC;
- MIMO/Massive-MIMO-assisted ISAC;
- ISAC for emerging physical-layer technologies;
- Implementation of ISAC in 6G applications, e.g., SAGINs, VR, AR.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
