

## Special Issue

# Deception-Enabled Cyber Intelligence for IoT

### Message from the Guest Editors

The Special Issue invites submissions that detail novel and diverse contributions relating to cyber deception such as, but not confined to;

- Cyber Deception Operating Models – *establishing a pro-active posture and generating advanced detection of cyber threats*
- Optimisation of Deceptive Elements
- Deployment Challenges (IoT and OT Networks)
- AI in Deception
- Data-driven Implementations
- Integration of Deception into Wider Eco-systems
- Real-World Use Cases – *performance of deception deployments in enhancing the quality of digital intelligence; evidence of measurable benefits*

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
