

Special Issue

Remote Sensing of the Earth from Space

Message from the Guest Editor

It is our great pleasure to organize a Special Issue on the topic of "Remote Sensing of the Earth from Space". This Special Issue will report on new results, advances, and directions for the application of remote sensing of the Earth from space using satellites and constellations. Topics include, but are not limited to, the following:

- Earth radiation budget with its applications ;
- Temperature vertical profile with its applications;
- Airglow with its applications;
- Stratospheric aerosols and composition with its applications;
- Solar variation with its applications;
- Land and ice evolution with its applications.

Contributions to the Special Issue entitled "Remote Sensing of the Earth from Space" may cover a broad range of approaches, ranging from research and application-oriented papers to more theoretical studies discussing recommendations for more effective solutions to these challenges now and in the future using satellite constellations.

Guest Editor

Dr. Mustapha Meftah

LATMOS, CNRS, Université de Versailles Saint-Quentin-en-Yvelines, Université Paris-Saclay, Sorbonne Université (SU), 11 Boulevard d'Alembert, 78280 Guyancourt, France

Deadline for manuscript submissions

closed (31 October 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
