

Special Issue

Selected Papers from RTUWO'18

Message from the Guest Editors

The need for a new communication systems to cope with the call for new services demanding higher performance, larger throughput, wider bandwidth and lower bit-error-rates, requires the development of new methodologies and techniques. The scientific conference **RTUWO'18** is focused on new techniques extending limits of currently used communication systems. The conference seeks submissions from academia, industry, and government institutions to present novel research on wireless and optical communication systems. This Special Issue aims to collate the selected extended papers related to sensors from **RTUWO'18**. Topics of interest include, but are not limited to, the following: Optical Communications
Wireless Communications Systems and Applications

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
