Radar Sensing for Human Healthcare

Message from the Guest Editor

We would like to invite you to contribute to the field of Radar Sensing for Human Healthcare by submitting articles discussing your recent research. Contributions may discuss (but are not limited to) the following topics:

- Vital signs monitoring based on radar;
- Heart rate variability and respiratory abnormalities estimation based on radar;
- Human activity estimation and fall detection warning based on radar;
- Sleep monitoring and sleep disorder detection based on radar;
- People detection and localization based on radar networking

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
