

# Special Issue

## Recognition Robotics

### Message from the Guest Editor

Perception of the environment is an essential skill for robotic applications that interact with their surroundings. Along with perception often comes the ability to recognize objects, people, or dynamic situations. This skill is of paramount importance in many use cases, from industrial to social robotics. This Special Issue addresses fundamental or applied research in object recognition, activity recognition, and people recognition, focusing on robotic applications. ## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
