Special Issue

Sensor and Embedded System Applications in Structural Engineering and Engineering Seismology

Message from the Guest Editor

In the last decade, the growing availability of compact and inexpensive hardware/software development platforms, self-contained electronic modules, and small form sensors for detecting and measuring almost any physical quantity has allowed the research community to develop novel prototype or end-product embedded systems for engineering applications. The key factor that led to this recent boost of innovation across different engineering disciplines was the open source rationale of the above building components. As a result, the multidisciplinary challenge of developing electronic devices for applications on dissimilar engineering fields has become feasible. This SI is dedicated to original research on the development and verification of novel sensor-based embedded systems for laboratory, structural, construction site or free-field applications. Topics related to this SI include but are not limited to:

- Experimental measuring
- Earthquake detection, monitoring and early-warning systems
- Structural health monitoring
- Active/hybrid seismic control systems
- Sensors and sensor fusion
- Sensor networks and IoT
- Smart materials and structural components
- Energy storage and harvesting

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
