State-of-the-Art Optical Sensors Technology in China

Message from the Guest Editors

The development of information technology relies on the advancement of optical sensors. In this Special Issue, we shall focus on State-of-the-Art Optical Sensor Technology in China. The issue will cover all aspects of optical sensing materials, devices, and systems, including but not limited to photodetectors, optical fiber-based sensors, Lidar, optical sensing and imaging for biomedical applications, advanced microscopy, advanced imaging technology, sensor network, infrared light field control, multimode infrared detection, etc. For more details, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
