

## Special Issue

# State-of-the-Art of Wearable Sensors in Canada

### Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of the state of the art of wearable sensor development and application in Canada. We invite research articles that profile the broad spectrum of topics related to wearable sensors from technology and platform development, data analytics, data management, or security/privacy to the use of wearable technology across health care, workplace and sport/performance applications. Applied studies can range from population studies to feasibility or case series. Studies that focus on knowledge translation, implementation, and evaluation of wearable sensor technology are also encouraged. This Special Issue will publish high-quality research papers and review manuscripts.

### Guest Editors

Prof. Dr. William McIlroy  
Dr. Karen Van Ooteghem  
Dr. James Tung

### Deadline for manuscript submissions

closed (20 November 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
