

Special Issue

Smart Devices in Real-Time Monitoring

Message from the Guest Editors

This Special Issue will cover the state of the art and advances in technologies, methodologies, and applications of real-time intelligent systems that improve reliability, operational efficiency, and energy efficiency, as well as reduce costs and resource consumption. It also aims to increase knowledge in the field of smart sensors, sensor networks and interconnection protocols, data monitoring and management, or research topics that would lead to industrial, scientific, and medical applications of these systems. We encourage you to participate in this Special Issue. A non-exhaustive and non-limitative list has been established. Therefore, all papers related to the topics mentioned above that accomplish the purposes of the Special Issue will be accepted. Prof.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
