Special Issue

Advanced Sensor Fault Detection and Diagnosis Approaches

Message from the Guest Editor

Although hardware measurement equipment and soft sensing technologies have become more and more precise with the development of science and technology, we will inevitably face latent failures in sensors and measurement errors brought by these soft sensing technologies. With the aim to prevent the faults from damaging the stable industrial processes, many scholars have proposed a number of methodologies for fault detection and diagnosis, the target of which is to evaluate whether potential faults occur or not and to estimate the magnitude, location, and type of the failures. This Special Issue will focus on all types of methods designed for sensor fault detection and diagnosis.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
