

## Special Issue

# Smart and Future Applications of Internet of Multimedia Things (IoMT) Using Big Data Analytics

### Message from the Guest Editors

This Special Issue plans to solicit high-quality research on recent advances related to the Intelligent Internet of multimedia things and big data analytics. Contributions may tackle open research problems, integrate efficient novel solutions, carry out performance evaluation studies, and compare state-of-the-art solutions. Theoretical and experimental studies for IoMT and big data analytics systems and their usage in future technologies are welcome. The Special Issue aims at exploring the potential of IoMT and its applications using big data analytics by exploring beyond the existing approaches, and presents more advanced practices for knowledge extraction with authenticated implementations and results. **Keywords:**

- IoT
- IoMT
- big data
- smart healthcare
- smart city
- surveillance
- smart traffic management

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
