

## Special Issue

# Smart Sensors for Structural Health Monitoring and Nondestructive Evaluation

### Message from the Guest Editor

Structural health monitoring (SHM) and nondestructive evaluation (NDE) technologies can be used to identify the defects or damages and evaluate the health status of the components or systems to avoid structural failure or catastrophes. Sensors are widely used to collect information about the status of the engineering components or systems. The development and application of sensors are key research topics in the areas of SHM and NDE. This Special Issue will collect the most recent research where the sensors are used for SHM and NDE. In this Special Issue we look forward to receiving papers on a wide range of research topics, but not limited to, the following topics:

- Sensors and sensor array
- Sensor modeling and simulation
- SHM systems and technology
- Nondestructive testing and evaluation
- Structure diagnosis and performance evaluation
- Signal processing
- Artificial intelligence applications in SHM and NDE
- System and instrument development
- Field applications of SHM and NDE

For this Special Issue, you are also welcome to submit review papers that provide new assessments that report sensor development and applications in SHM and NDE.

---

### Guest Editor

Prof. Dr. Zenghua Liu

Faculty of Materials and Manufacturing, Beijing University of Technology, Beijing, China

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
