

Special Issue

Smart Cities and Smart Traffic: Sensors, IoT, and Intelligence

Message from the Guest Editors

Today's global evolution has made it possible to return technology to its original purpose, which is serving in the best way possible human beings, especially in the currently most widespread societal structure: the *city*. High-performance and cutting-edge technologies are literally everywhere and intensively used to assist and ease each aspect of the citizen's life, thus giving birth to one of today's most challenging, promising, and cross-disciplinary research topics: the *smart city*. In this Special Issue, we welcome applications focusing on data acquisition, use, and service delivery for the materialization of the smart city concept with an emphasis on the *smart traffic* axis (e.g., jam avoidance, safety, pollution reduction, city organization, etc.). We encourage works making an original and out-of-the-box use of deep learning, artificial intelligence, city microsimulation, bio-inspired algorithms, special hardware, etc. We welcome both research and review article submissions. If you are willing to contribute to this Special Issue, we would very much appreciate receiving via email the tentative title and abstract of your contribution.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
