Security and Privacy in Software Based Critical Contexts

Message from the Guest Editors

Topics to be considered:

- access control
- anonymity
- applied cryptography
- authentication
- cyber warfare and security
- complex systems security
- critical infrastructure protection
- data and application security
- data protection
- formal methods for security and privacy
- human factors in security and privacy
- identity management
- insider threats
- intrusion detection and prevention
- legal and ethical issues
- security and privacy metrics
- security and privacy policies
- security and privacy in cloud computing
- security and privacy in grid computing
- security and privacy in industrial systems
- security and privacy in sensor networks
- security and privacy in smart grid and distributed generation systems
- security architectures
- security management in complex scenarios
- surveillance systems
- threats, vulnerabilities, and risk management

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
