

## Special Issue

# Social Robots in Healthcare

### Message from the Guest Editor

Social robots are a dedicated subclass of autonomous and intelligent robots that are designed to interact, communicate, and collaborate with humans. This definition is broad and extends to companion robots, pet robots, and healthcare robots, to name a few. The current coronavirus pandemic and its toll on healthcare workers can be used as an incentive to researchers to address the design of social robots specifically for the healthcare sector. For detailed information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
