

Special Issue

Smart Sensors for Portable and Remote Measurement

Message from the Guest Editors

With the development of 5G and IoT technology, the demands of smart sensors for portable and remote measurement are increasing rapidly. Smart sensors are widely used in many research and industrial fields, such as the portable biosensing of cancer and blood diseases; and even for wind, rain and vibration detection in remote areas. Therefore, as a consequence of these requirements, it is mandatory to develop fast, simple, easy-to-use, portable, and cost-effective devices for portable and remote detection. This Special Issue will present new work on smart sensors for portable and remote measurement. The principles and applications will be analyzed and discussed deeply.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
