

## Special Issue

# Sensor Systems for Satellite Attitude Determination

### Message from the Guest Editors

Attitude determination of a space platform is a key task for mission success; it is at the basis of attitude control, which is crucial for almost all onboard operations. Hence, for the aforementioned kind of tasks, accurate onboard knowledge of satellite attitude is needed with respect to external references. Further, the concept of distributed space systems is receiving increasing attention for both current and future space missions, e.g., for remote sensing and space exploration applications. Consequently, technologies that are able to accurately estimate and control the relative attitude are needed. This Special Issue deals with all kinds of sensors and applications for absolute and relative satellite attitude determination, with focus on sensor technology, sensor data processing, multiple-sensor integration, sensor-specific algorithms for attitude determination, sensor design and modeling.... Original research contributions as well as state-of-the-art reviews on these topics are welcomed. For further information, please visit [mdpi.com/si/34875](https://mdpi.com/si/34875).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
