

Special Issue

Sensors for Toxins and Pathogen Detection 2019

Message from the Guest Editors

This special issue is dedicated to publishing articles that describe continued development in novel biosensors, nanosensors, aptasensors, bioluminescence, and bacteriophage-based methods for detection of live microbial pathogens and active toxins of significance to food/feed, water and environment to improving food safety, food production, and public health.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
