

Special Issue

Imaging and Sensing in Fiber Optics and Photonics: 2nd Edition

Message from the Guest Editors

Optics and photonics technologies are particularly suitable for the development of high-sensitivity sensors. Furthermore, imaging and sensing techniques could pave the way for many important biomedical applications. Due to the wide application of optical sensors, the design of innovative optical sensing techniques for specific applications requires an in-depth understanding of the optical, material, and environmental properties that affect the performance of optical and photonic sensors. To date, many innovative structures, along with novel materials and different preparation techniques, have emerged in the design and preparation of optical and photonic sensors.

This Special Issue welcomes the submission of original and review articles by leading groups and scientists in the field of optical and photonic sensing technologies. Novel imaging and sensing techniques, as well as the results of their application, will be presented in this Special Issue.

Guest Editors

Prof. Dr. Chuen-Lin Tien

Department of Electrical Engineering, Feng Chia University, Taichung 407, Taiwan

Prof. Dr. Han-Yen Tu

Department of Electrical Engineering, Chinese Culture University, Taipei 111396, Taiwan

Deadline for manuscript submissions

31 December 2026

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
