

Special Issue

Practical Application of Sensors and Signal Processing Techniques in Mobile Robots

Message from the Guest Editor

The expectation in the field of mobile robots is the continuous revision and improvement of the classical designs and the development of new breakthrough ideas and concepts ready to implement new functionalities and applications in a highly unstructured real world. The application of sensors and signal processing techniques either as a part of a mobile robot or as a fundamental part of a device of a mobile robot is driving this continuous evolution. In this direction, the aim of this Special Issue is to highlight new advances in the field of mobile robots based, directly or indirectly, on the application of sensing concepts and methodologies.

Guest Editor

Prof. Dr. Jordi Palacín Roca

Laboratory of Robotics, Universitat de Lleida, Jaume II 69, 25001 Lleida, Spain

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
