

# Special Issue

## Semiconductor Sensor

### Message from the Guest Editors

Sensors play an important role in advancing technology for various applications. We encourage authors to submit original research papers on various types of semiconductor-based sensors, not including photosensors. The types of sensors we are interested in for this Special Issue include but are not limited to chemical/gas, radiation, biological, stress, and motion sensors. The articles can be related to the fabrication, characterization, modeling and reliability of the sensor devices. The semiconductors can be elemental or any compound semiconductor. Articles on novel applications of the existing sensor devices are welcome as well.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
