

## Special Issue

# Sensor Systems for Gesture Recognition

### Message from the Guest Editors

Gesture recognition (GR) aims at interpreting human gestures by means of math algorithms. Its achievement will have widespread applications in a number of different fields, with impacts that can help or meaningfully improve our quality of life. In the real world, GR can interpret communication meanings at a distance or can “translate” in written sentences or by a synthesized voice the “sign language”. In a virtual reality (VR) and augmented reality (AR) world, GR can allow navigating and/or interacting, as it occurs, for instance, with the user interface (UI) of a smart TV controlled by hand gestures. Potential topics include in this special issue “Sensor Systems for Gesture Recognition”, but are not limited to:

- Gesture recognition
- Gesture detection sensors
- Wearable sensors
- Human tracking
- Human postures and movements
- Motion detection and tracking
- Hand gesture recognition
- Gait analysis
- Pattern recognition for gesture recognition
- Machine learning for gesture recognition

---

### Guest Editors

Prof. Dr. Giovanni Saggio

Department of Electronic Engineering, University of Tor Vergata Rome, 00133 Rome, Italy

Dr. Marco E. Benalcázar

Department of Informatics and Computer Science, Escuela Politécnica Nacional, Ladrón de Guevara E11-253, Quito, Ecuador

---

### Deadline for manuscript submissions

closed (30 September 2020)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
