# Sensor Networking for Connected and Smart Mobility in Cities of the Future

### Message from the Guest Editors

Dear colleagues, This Special Issue aims to gather recent research findings and technology developments toward the conceptualization and realization of future mobility systems in the smart city context. We invite contributions on a broad range of topics, from the networking and processing of sensor data to the novel architectures and applications related to smart cities and future mobility. Particular topics of interest include, but are not limited to:

- smart cities;
- mobility and transport;
- wireless sensor networks;
- Internet of things;
- connected and automated mobility;
- intermodal urban mobility;
- vehicular networks;

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
