

## Special Issue

# Sensors and Applications in Diagnostics, Food and Environmental Analysis

### Message from the Guest Editors

The use of sensors has rapidly grown in last two decades because of the development of smart and microtechnologies, and the demand for fast, pervasive, and real time monitoring of analytes. Since diagnostics, food, and environmental applications drive the research, this Special Issue addresses the most recent methods and materials to develop reliable sensors that can replace or support existing devices for point-of-care or lab analyses in these fields.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
