Special Issue

Sensors Based on Diffraction Structures

Message from the Guest Editor

Optical sensors are widely used in various research and commercial applications today. These sensors are utilized for quality and process control, medical technologies, metrology, imaging, and remote sensing and laser, imaging systems, and or/fibers. This Special Issue of *Sensors* will focus on the recent developments of optical sensors based on diffraction structures. However, the issue is open for new proposals of novel sensing principals. Review articles and original research papers based on theoretical, numerical, and experimental work addressing new and innovative applications are welcome. **Keywords:**

- Biosensors
- plasmonic sensors
- resonance structures
- advanced sensing platforms
- aas sensors
- miniaturized lab-on-chip sensor designs
- diffraction structures
- surface plasmon-polariton
- vortex beam
- plasmonic lens

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
