

## Special Issue

# Sensors in Fluorescence Imaging

### Message from the Guest Editors

Fluorescence imaging has a tremendous impact in life science. In particular, the advent of the novel combination of spectroscopy with the design of chemical and biological biosensors make it possible to interrogate in vivo cell processes that before needed to be done in vitro. The application of these novel biosensors changes the output from raw images to quantitative biology, where these methods have a strong impact in biophysical and biological systems. The quantitative information provided in fluorescence gives us detailed maps of cellular processes at unprecedented spatial and temporal resolution. Sensors – in terms of fluorescence species, can be broadly separated into two types: (i) biosensors, to study biological processes and (ii) instrument sensors, which can be used for influencing the imaging. This Special Issue will cover state-of-the-art developments in biosensors and their applications for life science.

- Fluorescence
- Biosensors
- Image sensors
- FLIM
- Hyperspectral imaging

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
