

Special Issue

Sensors in Intelligent Industrial Applications

Message from the Guest Editors

Over the past century, the manufacturing industry has undergone a number of paradigm shifts. The next natural evolutionary step is to provide value by creating industrial assets with human-like intelligence. This will only be possible by further integrating sensors technology into the manufacturing processes in which industrial equipment is monitored and controlled for analysis. This special issue aims to collect cutting-edge research works that are being carried out in a fast growing field of research, such as artificial intelligence applied to industry and production processes. You are invited to submit original research contributions in all related areas.

Guest Editors

Dr. Alberto Tellaeche

Faculty of Engineering, University of Deusto, 48007 Bilbao, Spain

Dr. Hugo Landaluce

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
