

Special Issue

Smartphone Sensors for Indoor Positioning

Message from the Guest Editors

The wide proliferation of mobile devices, especially smartphones, has initiated several intuitive and diverse services including on-the-go services, online customer services, and location-based services (LBS), among others. Accurate location information serves as the backbone of LBS, which is offered both outdoors and indoors. Sensors are being increasingly embedded in modern smartphones, which can be leveraged to estimate the user's current location. This Special Issue will focus on the publication of high-quality research articles and review papers that present advanced solutions using smartphone sensors for positioning and localization. Topics of interest include, but are not limited to, the following:

- Indoor positioning using 4G and 5G cellular networks
- Positioning using wireless local area network
- Pedestrian dead reckoning systems

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
